SCHEDULES

9. SCHEDULES

SCHEDULE ONE – CRITICALLY ENDANGERED ECOLOGICAL COMMUNITIES AND ENDANGERED ECOLOGICAL COMMUNITIES BY RESERVES

An ecological community is a naturally occurring collection of native plants, animals and other organisms occupying a particular area. Ecological communities are threatened when they become at risk of extinction. The *Biodiversity Conservation Act 2016* lists over 100 threatened ecological communities (TEC). The table below identifies which TEC are present on community land within the Camden LGA.

Council has responsibilities as part of coordinated efforts to maximise long term survival of threatened species or ecological communities. These have been identified within relevant recovery plans listed under the *Commonwealth Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)* and previously under the *NSW Threatened Species Conservation Act (1995)*.

*CUMBERLAND PLAIN RECOVERY PLAN (2010) = C

*PIMELEA SPICATA R. BR. RECOVERY PLAN (2005) = P

SUBURB	RESERVE NAME	ADDRESS	PLAN	THREATENED ECOLOGICAL COMMUNITIES	APPLICABLE RECOVERY PLANS
Camden	Belgenny Reserve	18 Onslow Avenue, 18a Belgenny Avenue, 2 Belgenny Avenue, 24a Belgenny Avenue, 36 Belgenny Avenue	DP 29126, DP 219613, DP 219613, DP 236805, DP 251669	Cumberland Plain Woodland/River-flat Eucalypt Forest	C

Gundungurra Reserve South	Liz Kernohan Drive	Spring Farm	503	1220069

Schedule Five – Threat Abatement Plans

The following table identifies relevant threat abatement plans and actions relevant to the Camden LGA

THREAT ABATEMENT PLAN	THREATENED OR ENDANGERED BIODIVERSITY IDENTIFIED IN THE THREAT ABATEMENT PLAN AND REPORTED IN THE CAMDEN LGA	RELEVANT ACTIONS
'Threat abatement plan for competition and land degradation by rabbits, Commonwealth of Australia 2016'.	<i>Cynanchum elegans</i> (White-flowered Wax Plant).	- Create incentives for coordinated strategic controls across adjacent properties in areas occupied by rabbits; - Help local land managers adopt locally appropriate monitoring and control methods through developing training programs; and - Promote and seek engagement across the community to educate about the impacts of rabbits and the importance of adopting appropriate control measures.
Threat abatement plan for disease in natural ecosystems caused by <i>Phytophthora cinnamomi</i> , Commonwealth of Australia 2018'.	- Cumberland Plain Shale Woodlands and Shale-gravel Transition Forest; and - Western Sydney Dry Rainforest and Moist Woodland on Shale.	- Implement risk mitigation and management actions to protect priority biodiversity assets from the impacts of <i>Phytophthora</i>; - Develop and implement practices to minimise the inadvertent spread of <i>Phytophthora</i>; - Promote use of guidelines to minimise risks from <i>Phytophthora</i> arising from environmental restoration activities; - Develop and implement training and education accessible to all stakeholder groups; - Acquire and maintain up-to-date information on <i>Phytophthora</i>; and - Integrate messages about <i>Phytophthora</i> hygiene measures into materials addressing multiple pest and pathogen threats.

THREAT ABATEMENT PLAN	THREATENED OR ENDANGERED BIODIVERSITY IDENTIFIED IN THE THREAT ABATEMENT PLAN AND REPORTED IN THE CAMDEN LGA	RELEVANT ACTIONS
Threat abatement plan for predation by feral cats, Commonwealth of Australia, 2015'.	• <i>Botaurus poiciloptilus</i> (Australasian Bittern); and • <i>Lathamus discolor</i> (Swift Parrot).	• Incentivise feral cat management into standard land management for biodiversity outcomes; • Provide information and training on best practice control methods and standard operating procedures for controlling and monitoring feral cats; and • Promote and seek community engagement in understanding the threat posed by feral cats to biodiversity and need for responsible cat ownership including reduction of food and resources for stray cats.
Department of the Environment, Water, Heritage and the Arts (DEWHA) (2008). <i>Threat abatement plan for competition and land degradation by unmanaged goats</i> , DEWHA, Canberra.	• <i>Calyptorhynchus lathami halmaturinus</i> (Glossy Black-cockatoo); and • <i>Cynanchum elegans</i> (White-flowered Wax Plant).	• Promote the maintenance and recovery of native species and ecological communities that are affected by competition and land degradation by unmanaged goats; • Identify priority areas to control unmanaged goats; • Develop training programs to help land managers identify locally appropriate control methods and when to apply them; and • Promote the adoption and adaptation of the model codes of practice and standard operating procedures for humane management of goats.
Department of the Environment, Water, Heritage and the Arts (DEWHA) (2008). <i>Threat abatement plan for predation by the European red fox</i> , DEWHA, Canberra.	• No specific native species identified.	• Promote the maintenance and recovery of native species and ecological communities that are affected by fox predation; • Identify priority areas for fox control; • Conduct and monitor regional fox control through new or existing programs; • Continue to promote the adoption and adaptation of the model codes of practice and standard operating procedures for humane management of foxes; and • Increase awareness of all stakeholders of the objectives the threat abatement plan and the need to control and manage foxes
