

# Flood Extents: 1% AEP, 5% AEP and PMF Flood Events.

## Nepean River Flood Study, March 2015

### Legend

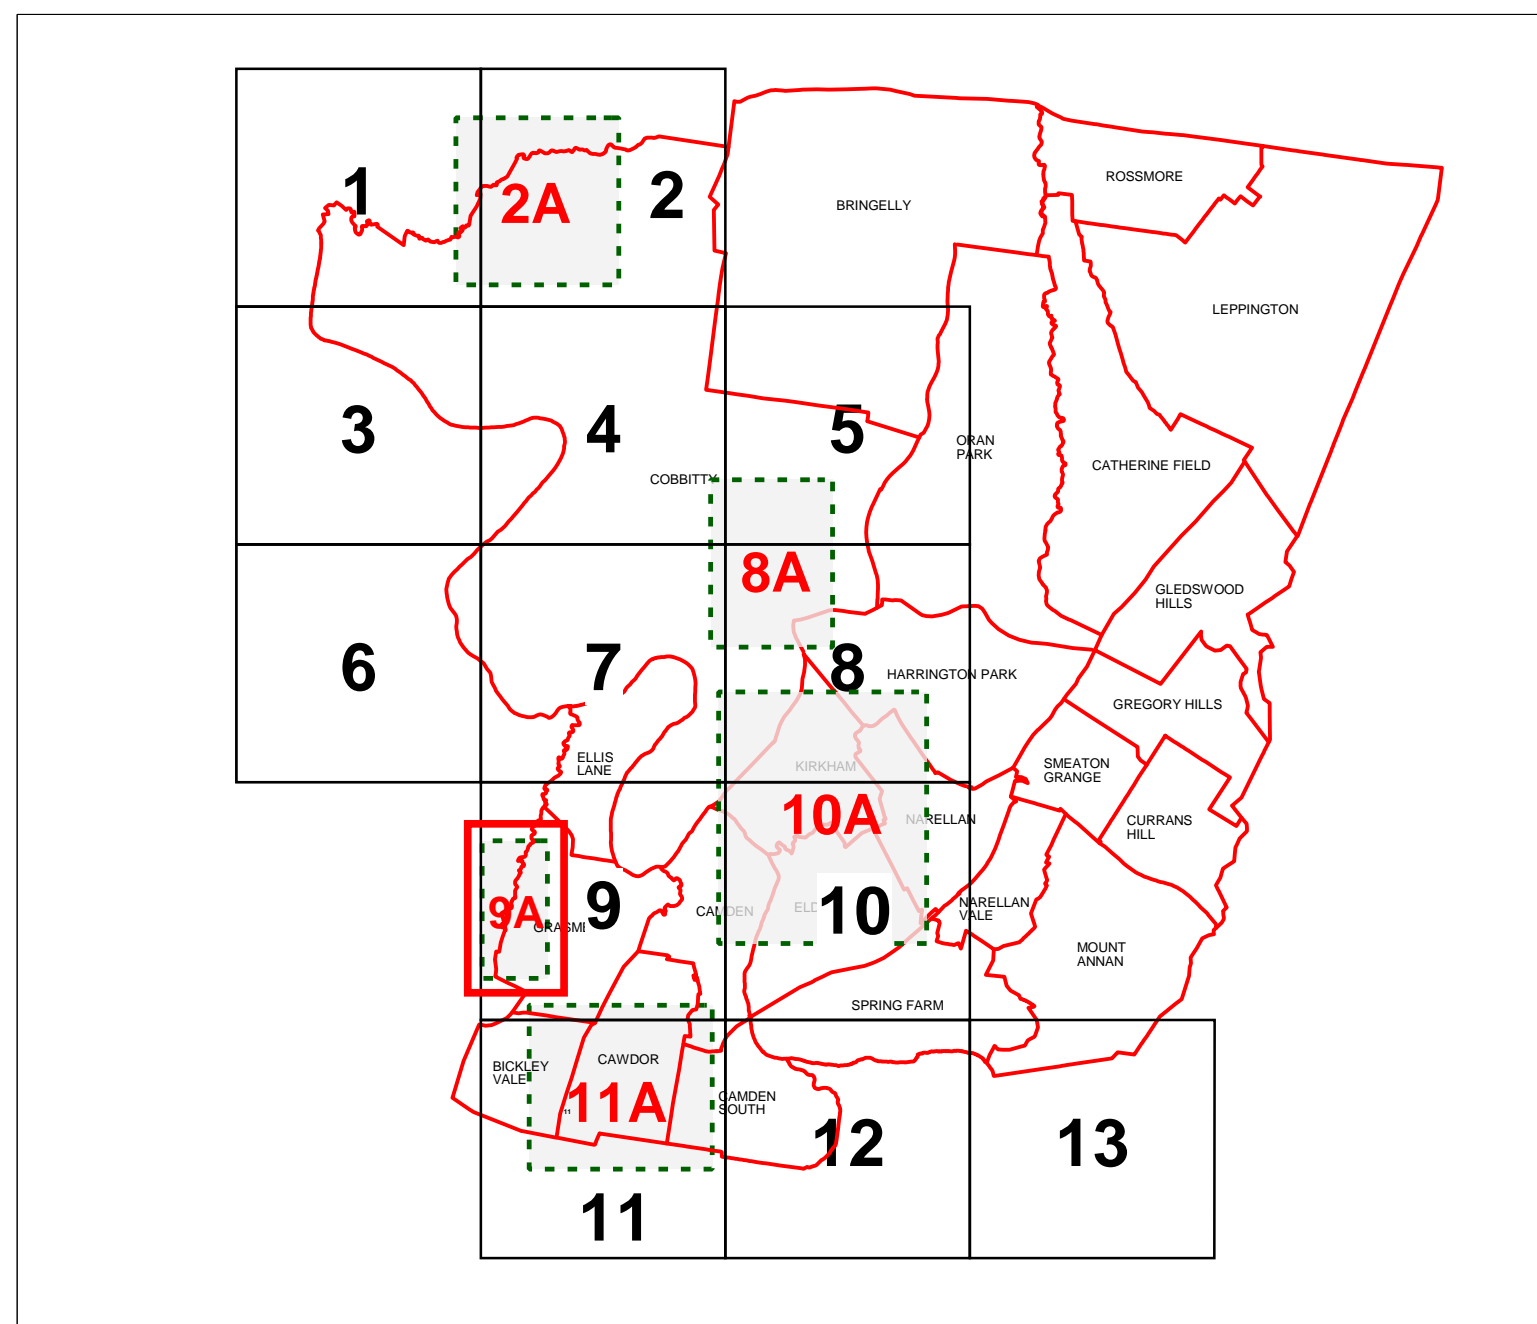

-  Probable Maximal Flood (PMF), Nepean River Flood Study, 2015
-  1% Annual Exceedance Probability (1% AEP), Nepean River Flood Study, 2015
-  5% Annual Exceedance Probability (5% AEP), Nepean River Flood Study, 2015
-  Probable Maximum Flood (PMF), Tributary Flood Studies 1999.
-  1% Annual Exceedance Probability (1% AEP), Tributary Flood Studies 1999.
-  5% Annual Exceedance Probability (5% AEP), Tributary Flood Studies 1999.
-  The hatched areas are currently undergoing development and as such, may be subject to changes
-  Limits of Nepean River Flood Mapping in other Tributaries (see Note 6)
-  Camden LGA Boundary

### FLOOD INFORMATION

Information only relevant to this page is provided here.

1. The Flood Mapping (1% AEP, 5% AEP & PMF flood lines) shown in the Inset Maps for Upper Catchment of Sickles, East & West Matahil, Cobbitty and Bringelly Creeks has been prepared by Council Land Information Section, based on the results provided in Flood Study, 1995 and Tributary Flood Studies 1999 (which is currently being used) as this area is outside the limits of Nepean River Flood Study, 2015.
2. The extents of flood inundation indicated by flood lines are approximate only. For greater accuracy, you should obtain a Flood Certificate from Camden Council which will provide flood levels to Australian Height Datum (AHD) and these can be compared to actual site levels.
3. Limits of Nepean River Flood Mapping in tributaries: Flood Mapping upstream of tributaries, beyond Nepean river backwater limits is not provided under Nepean river Flood Study 2015.
4. The flood shown on these plans is for main stream flooding. Overland flow paths are not shown.
5. Climate change has not been considered in the Nepean River Flood Mapping at this stage. It is expected that existing flood behaviour and levels will change due to the impacts of Climate Change.
6. Limit of Nepean River Flood Mapping: The limit of Nepean River Flood Mapping is up to the confluence of Nepean River and Narellan Creek. Nepean River flood extents (backwater) along Narellan Creek, upstream of this limit of mapping will be provided in Narellan Creek Flood Study.
7. The information contained on these maps is correct to the best of Council's knowledge. However, no warranty or guarantee is provided by Council and no liability is accepted for any loss or damage resulting from any person relying upon or using the information contained in the map. Flood information and levels are subject to change (without notice) based upon matters such as new or improved flood study data, climate change and changes to the built / natural environments.
8. In accordance with section 733 of the Local Government Act 1993, Council is not liable in respect of any advice furnished in good faith by the Council relating to the likelihood of any land being flooded or the nature or extent of any such flooding, or anything done or omitted to be done in good faith by the Council in so far as related to the likelihood of land being flooded or the nature or extent of any such flood.
