Narellan Sports Hub stage two design tender accepted

Narellan Sports Hub Stage 2 is a step closer to reality with Council accepting a tender for the design of the facility this week.

Council successfully secured funding from the Western Sydney Parkland City Liveability Program and the Greater Sydney Sports Facility Fun for the design and construction of Narellan Sports Hub Stage two early this year.

Mayor of Camden, Cr Theresa Fedeli said it was exciting to take the first step into the expansion of the facility.

“Narellan Sports Hub is already such a fantastic state-of-the-art facility and the next phase will truly make it the sporting home in the Camden area,” Cr Fedeli said.

“The Sports Hub has already hosted state netball and hockey titles and when stage two is complete, it will become a venue other sporting organisations look at to host bigger events with athletics and rugby league facilities in the plans amongst many other exciting things.

“This is just the beginning of great things for our state-of-the-arts facility and I am looking forward to seeing the final design.”

Narellan Sports Hub Stage will include:

- Fourteen additional netball courts with floodlighting;
- Synthetic athletics track including field and jump facilities, lighting, drainage and irrigation;
- An additional international size rugby league field to replace a smaller ‘mod league’ field including floodlighting and drainage. The existing full-size field will be reconstructed with new lighting, irrigation and drainage;
- An athletics administration building adjacent to the existing netball building;
- Car parking – approximately an additional 1200 spaces in four new carpark areas;
- Access roads including internal intersection treatments;
- A criterion race track utilising the main circulation access road;
- Road bridge and two pedestrian bridges over the existing drainage corridor;
- Future multi-purpose sporting area;
- Pedestrian and cycle path network; and
- Associated services and infrastructure.

The facility currently features 30 netball courts, amenities building, playground, access roads and 400 car parking spaces.

CHRISP Consulting Pty Ltd was selected to design the second stage of the facility. The design consultancy works are expected to be completed in early 2020.
